UNMATCHED PERFORMANCE

UBQuant is your UBPR analytics tool. While the typical UBPR reporting provides you necessary information, UBQuant analytics drives you towards better insights. UBQuant offers a comprehensive analytics solution for the bank UBPR/Call Report analysis with fast, interactive, and responsive interfaces.

CLOUD PLATFORM

There is no data management needed, no uploads or downloads required. UBQuant manages, maintains, and services up to date data. Our platform is innovative and unique in providing ability to create custom peer-groups of any combination, and drive analytics in real-time, over all possible data combinations instantly.

STRATEGIC INSIGHTS

Bank performance evaluation and horizontal analysis with call/UBPR data analytics, competitive insights, and regulatory adequacy analysis. Our platform empowers you to cost-effectively drive through data based intelligent decisions and perform comparative analytics.

UBQuant software offers the most robust solution by making the complex data points easy to assess and perform benchmark analysis, enabling you to focus on what-ifs.

KEY FEATURES

- **Financial Highlights** Dynamic and explorable snapshot of 4-year financial report highlights. The metrics include most critically assessed metrics for easy reporting and a one-click drill-down to compare/trend with any peer group or trending.
- **Standard Ratios** From Summary Ratios to Fiduciary & Related Services, all regulatory categorized UBPR metrics organized for intuitive access and better analytics. Plus, research analysis on any UBPR or Call report metric.
- **Critical Ratios** UBQuant pre-defined Capital Adequacy, Asset Quality, Earnings, Liquidity metrics and other critical metrics with real-time formula-based computations to provide deeper insights for premium users.
- **Custom Ratios** UBQuant pro users can define their own custom formula ratios to build their personal set of analytics. Real-time computations yield instant results along with peer computations and trends. No limitations or restrictions on metrics - any valid Call and/or UBPR metric combination can be used.
